

## Computer Workshops 2010

Technology is yet another avenue in serving God's purposes. Novaliches Christian Fellowship recognizes that fact as its Computer and Multimedia Ministries have started to offer free computer workshops this summer.

Starting early in May, tutorials have begun on a wide range of softwares and skills, from basic word processing to troubleshooting, all the way to image editing, animations, and audio-visual presentations (AVP).

Both ministries work hand-in-hand in keeping NCF's communications up and running in different media, be it print, audio, video or online.

Bro. Jonel Rubio handled classes on PC Troubleshooting and Adobe Photoshop, while Bro. Joshua Dantes handled MS Office Basics. Sis. Dang Baldonado lectured on AVP basics, Bro. Jay Baldonado taught audio

editing and Sis. Apple Ilagan held the class on Adobe Flash.

Tutorials on Adobe Photoshop and Flash are extended to June and are still ongoing. The classes are free of charge and are open to members and non-members alike.
